

TSID Assignments

The ATSC PSIP Standard A/65 (Program and System Information Protocol) requires that each digital television broadcaster be assigned a unique 16-bit Transport Stream Identifier (TSID). The TSID facilitates tuning of the desired channel by those receivers equipped to utilize it. Over the past several years, ATSC, MSTV, and NAB have repeatedly urged the FCC to assign TSIDs to each DTV licensee without delay in order to not impede the roll-out of DTV service. The FCC has indicated its intention to be responsible for implementation and maintenance of TSID assignments, but it has not yet begun this process. In the interim, MSTV has created and maintained a proposed table of TSID assignments, which we have forwarded to the FCC with the recommendation that it be adopted.

The PSIP standard specifies that the TSID be a 16-bit unsigned integer field in the range of 0x0000 to 0xFFFF. (This provides for a possible 65, 536 assignments, only a fraction of which would be used in the United States. The FCC will need to coordinate use of the others with Canada and Mexico.) The standard also permits the NTSC station paired with each DTV station to be assigned a related unique 16-bit Transmission Signal Identifier (also called "TSID"), which can be transmitted in the NTSC VBI using a method specified in EIA-752. (A value of 0xFFFF is to be used for analog channels that do not have a valid TSID.) The ATSC has recommended that DTV stations be assigned only odd TSIDs (*i.e.*, LSB = 1), so that those stations wishing to include a TSID in their NTSC transmissions could use the related even value (LSB = 0).

We have followed the above specifications and recommendations in our proposed table. Further, we understand that encoder manufacturers who have implemented PSIP are currently shipping product with the TSID set to either 00" or 01" as a default value. Therefore, we have begun the numbering with 02" in order that these default values not represent any actual assignment. The methodology we have used is straightforward, assigning consecutively ascending values to stations in the order in which they appear in the FCC's DTV Table of Allotments, Appendix B of the Memorandum Opinion and Order on Reconsideration of the Sixth Report and Order, February 1998. We have continued to make additional TSID assignments, upon request by new DTV licensees who do not appear in the original Table. When there is no corresponding NTSC license, the corresponding NTSC TSID is reserved in order to preserve the pair-wise assignments.

We urge stations to implement their assigned TSIDs quickly, in order that receivers having the advanced navigation features made possible by the ATSC PSIP standard can function fully and correctly.

TSID Assignments

12/9/98
